DETAILED ACTION

- 1. Claims 1-46 are pending.
- 2. The IDS filed 09/26/02 has been considered and entered as paper no. 4.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to designating a first user as an eligible data sharing contributor, classified in class 707, subclass 103%.
 - Claims 21-46, drawn to facilitating authorization of members of data sharing entities, classified in class 345, subclass 751.
- 4. Inventions Group I and Group II are related as combination and subcombination disclosed as usable together. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention Group I has separate utility such as the designation of a first user as an eligible shared data contributor, designating an authorized service component of the eligible shared data contributor, defining the data publication, tagging the data managed by the publishing component, designating a second user, associating the second user as a subscriber, contributing data managed by the publishing component, and facilitating access to the data managed by the publishing component. Group II has separate utility such as the facilitation of authorization of members of the data sharing entities and conditionally permitting a second user to invoke a first method. See MPEP § 806.05(d).

Application/Control Number: 09/771,515

Art Unit: 3624

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
